

The only system that oxygenates the water and keeps it at a constant temperature of 6-7°C

ZEN MODEL

New design for the well-known refrigerated show units. For creating an elegant corner dedicated to cut flowers.

The Zen model with crescent shape can be coupled up to form a flower-filled centre island with top-design finishes.

Drainage pump for monthly water change

Highly-modern concept motor made of copper and titanium

LEONARDO MODEL

The modular "Leonardo" model provides utmost flexibility. The basic configuration consists of two elements; the top one contains the motor and the bottom one contains a re-circulation system. Can be extended to a maximum of six tanks without any further changes to the motor.
